[71] Regarding the *Minutes* of the U.S.–Mexico International Boundary and Water Commission, the English-language texts from the U.S. Section, based in El Paso, Texas, and the corresponding Spanish-language *Actas* of the Comisión Internacional de Límites y Aguas, Sección Mexicana, based in Ciudad Juárez, Chihuahua, are cited in separate groups here. *Minutes* not relating to the Colorado River are not cited here. The *Minutes* that pertain to Colorado River water quality, usually about salinity issues, are cited here in Part 12, Section 1 of the bibliography rather than in Part 11, Section 1 because each pertains to construction activities and to politically and legally defined remedies rather than to scientific or other public reports on water quality. Citations for the *Minutes* in English were taken from the copies posted to the IBWC U.S. Section's website, https://www.ibwc.gov/Treaties_Minutes/Minutes.html, which copies are in English only.

Con respecto a las *Minutes* de la Comisión Internacional de Límites y Aguas de los Estados Unidos y México, los textos en inglés de la Sección de EE. UU., con sede en El Paso, Texas, y las *Actas* en español correspondientes de la Comisión Internacional de Límites y Aguas, Sección Mexicana, con sede en Ciudad Juárez, Chihuahua, se citan en grupos separados aquí. Los *Minutes* que no están relacionados con el Río Colorado no se citan aquí. Los *Minutes* que se refieren a la calidad del agua del Río Colorado, generalmente sobre problemas de salinidad, se citan aquí en la Parte 12, Sección 1 de la bibliografía en lugar de en la Parte 11, Sección 1 porque cada uno se refiere a actividades de construcción y remedios definidos política y legalmente en lugar de a informes científicos u otros informes públicos sobre la calidad del agua. Las citas para los *Minutes* en inglés fueron tomadas de las copias publicadas en el sitio web de la sección de los EE. UU. de la IBWC, https://www.ibwc.gov/Treaties_Minutes/Minutes.html, cuyas copias están en inglés solamente.

PART 12. WATER SUPPLY, MANAGEMENT, AND POLICY . . . AND INFRASTRUCTURAL PROJECTS

SECTION 2. **ANCILLARY COVERAGE**: INFRASTRUCTURAL PROJECTS ALONG THE COLORADO RIVER BETWEEN LOWER GLEN CANYON AND MEXICO THAT ARE NOT RELATED TO WATER MANAGEMENT FACILITIES

NOTES FOR PART 12, SECTION 2

THIS SECTION includes such topics as bridging projects on the Colorado River between Glen Canyon (Arizona) and Mexico. Infrastructural projects that are or do relate to water management facilities (for example, dams, their apurtenant structures, aqueducts, and power lines from hydropower dams), are included in Section 1 of Part 12. Completed and unrealized projects are cited.

Items relating to tramways across or on the sides of the Grand Canyon are included in Part 2 (GENERAL PUBLICATIONS). Items relating to the Navajo Nation's proposed Grand Canyon Escalade in the early 21st century are included in Part 17 (NATIVE AMERICANS).

Omitted from this Section are items that relate to the reconstruction of London Bridge in Lake Havasu City, Arizona. This is a tourism destination that does not cross the Colorado River and has no contribution to the history of lower Colorado River infrastructural projects; thus, items pertaining to London Bridge are historical in nature and will be found in Part 2.

Also omitted from this section are items that relate to the survey for the Denver, Colorado Cañon & Pacific Railroad—the Stanton Expedition—of 1889–1890. It is historically more well known as a Colorado River boating expedition with a photographic record, with significant numbers of items written about it in that context. Never built, few published items relate to the technical details of engineering problems of the railroad; none (of course) to construction news. All citations regarding the Stanton Expedition will be found in Part 2. Items that rely on the historical series of photographs taken during this expedition in Grand Canyon will be found in different parts of the bibliography; for example, citations about general views in Part 2, comparative surveys of vegetation in Part 19 [BIOLOGY AND ECOLOGY], and comparative surveys of sedimentation along the Colorado River in Part 22 [HYDROGEOLOGY OF THE COLORADO RIVER].

Disambiguation: This section includes items that relate to the Hoover Dam Bypass, the key feature of which is the later formally named Mike O'Callaghan-Pat Tillman Memorial Bridge. Items that relate to the Boulder City Bypass that is part of the I-11 highway are cited in Part 2 (GENERAL PUBLICATIONS) of this bibliography.

The distance from rim to rim in mid air, as the crow flies, is thirteen miles. The distance going down the north wall, crossing the river on the cable and ascending the north wall, is fully twenty miles.' [¶] Those of our readers familiar with the mathematics of the catenary curve may be interested to compute the total vertical drop of a cable with a length of 20 miles and its points of support 13 miles apart. Those who are not can easily see by a roughly approximate computation that the lowest point of such acable would be several miles lower than the Colorado River at

		the bottm of the gorge. It may be added that as a cable of such a span, even if made of high-grade steel wire, would barely support its own weight, no passengers are likely to take the dizzy ride for some time to come.” (ENTIRE ITEM)] [Note that there is some confusion with the *Engineering News* statement, which seems that the proposed cableway would be from rim to rim. 1906 12.9680 The aerial cable bridge across the Colorado River. *In:* Letters to the Editor [SECTION]. *Engineering News*, 55(18) (May 3): 501. [“Referring to the editorial note in Engineering News of April 19 (p. 447) we will say that on again reading our news sheet you will note that the cable is to be stretched from *bank to bank across the granite gorge* of the Colorado River, and not from rim to rim of the Canyon itself. The Grand Canyon may be likened to a deep trough—the river runs through the bottom of the trough in a narrow gorge, through the granite, about 1,000 ft. deep and from 300 to 400 ft. wide. [¶] In using this aerial ferry, the tourist will go down Bright Angel trail from the hotel, eight miles on horse back to the top of the granite wall, take the cable across about 400 ft. and then ascend the north wall about twelve miles. Of course a cable, stretched 18 miles from rim to rim would be impossible and absurd.” (ENTIRE ITEM)] [Pertains to the item about the Santa Fe’s proposed cableway, noted in the April 19 issue (see Anonymous, 1906, ITEM NO. 12.9665).]

ADMINISTRATIVE AND MANAGEMENT ISSUES IN THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

Publications about executive, legislative, and judicial actions, management issues, and concomitant concerns that pertain to federal, state, and Native American lands in the Grand Canyon and lower Colorado River regions. Occasional additional items regarding topics of administrative interest in the States of California, Nevada and Utah as they directly relate to the region covered here, are likewise included, as is matter relating to the formulation and management of World Heritage Sites and other such places of international interest.

AS A pragmatic matter of bibliography all items relating to water-management in the lower Colorado River, including legislative and judicial actions regarding dams and other water-management infrastructure, and international treaties and agreements pertaining to these subjects (that might otherwise be relegated to Part 13 of this bibliography), are consolidated in Part 12, Section 1 (WATER SUPPLY, MANAGEMENT, AND POLICY).

PART 13. ADMINISTRATIVE AND MANAGEMENT ISSUES IN THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

OVERVIEW. This part pertains principally to the Grand Canyon and lower Colorado River areas in the U.S., although a few items pertaining to Mexico are included. This part comprises items broadly relating to administrative or operational issues and reports of activities for Grand Canyon National Park (including management concerns along the Colorado River), its predecessor administrative units, and for other federal, state, and Native American lands and facilities. These areas include the Grand Canyon–Parashant National Monument, Gold Butte National Monument, Vermilion Cliffs National Monument, that part of Glen Canyon National Recreation Area between Glen Canyon Dam and Lees Ferry, Lake Mead National Recreation Area, and lands and facilities administered by the U.S. Bureau of Reclamation, U.S. Bureau of Land Management, and U.S. Forest Service. More than documents about bureaucratic procedures and regulations are listed. Added here are items about public commentary on, and responses to, proposed and implemented studies and management decisions, including those of activists; and published opinions and commentary about the protection, operation, and public use of the lands. Other management issues, for example those that relate to the operation of the Navajo Generating Station near Page, Arizona, are included here. Items that relate to natural quiet in Grand Canyon are included in this part if they pertain specifically to management issues; items that pertain to the scientific study of ambient noise and the natural soundscape of Grand Canyon are consolidated with Part 18 (PHYSICAL ENVIRONMENT) of this bibliography. Documents that are **Environmental Impact Statements**, and similar administrative and guidance documents, are mostly included in this part (Part 13) because they often embrace multiple areas of administrative oversight and are not solely focused on ecological concerns as might be inferred from the title; grouping all such management documents together in this bibliography is more sensible. Exceptions are those documents that are specifically or predominantly biological or ecological in perspective, which are included in Part 19 (BIOLOGY AND ECOLOGY, for those items that pertain to the greater Grand Canyon region) or in Part 11, Section 1 (for those items that pertain to the environment of lower Colorado River region locales), or items that relate to Native American cultural issues specifically, which are in Part 17 (NATIVE AMERICANS OF THE GRAND CANYON REGION) or in Part 11, Section 3 (lower Colorado River region locales). Items regarding administrative issues that pertain to non-federal areas adjacent to these federal areas are listed here. Also included in this part are some items that pertain to cession of territories and boundary issues in the Grand Canyon–lower Colorado River region. Selected items pertaining to the administration of Glen Canyon Dam, and position statements by individuals or organizations, as inferentially affecting the region downstream from it, also are included here. Items about personnel matters in the areas of concern here are listed in this part. Matter relating to the formulation and management of World Heritage Sites and such places of international interest are included here, such as those under UNESCO and IUCN (general news items pertaining to these sites will be found in Part 2 [General and Commonplace Works]).

1905 13.3227 [Game preserve.] *Shooting and Fishing*, 38(23) (September 14): 445. [“It is understood that the Utah and Arizona representatives in Congress have agreed to join in placing before the next session a bill making a game preserve on the region lying between the southern Utah line and the Grand Canon of Arizona, an area of about 2000 square miles. It is intended that the Government shall stock the ground with buffalo and rare animals and shall fence it in. Only a few years ago the district proposed to be stocked was full of deer and antelope, which have been almost entirely destroyed by Ute Indians from Colorado, who slaughtered the game wontonly and unnecessarily.” (ENTIRE ITEM)]

1905 13.3520 Utah party on Arizona “strip”. How school question cuts figure in proposition to annex it to Utah. Will meet delegate Smith. Environment America [75]

2016 13.4653 The Grand Canyon needs your help now. *Environment Arizona* (Phoenix), 10(1) (Fall): 1. [The text in this state-focused serial, as compared to others in the Environment America series, begins with a paragraph different from the others: "Arizonans know that the Grand Canyon is one of the most amazing places in the world—from the iconic landscape and winding Colorado River to the unique cultural and natural heritage." The other state-focused issues of these Environment America productions otherwise all begin, "Whether they live in Arizona or here in [state name] like you, Americans know that the Grand Canyon . . . ." The remaining text and photo layouts for this item remain the same, although each state-specific issue displays a banner photo from that state.]

[75] The Environment America series cited here is actually produced in state-specific issues, with state-specific addresses and with variant volume and issue enumeration (as cited); all issues seen display a non-profit postage address in Brockton, Massachusetts. "Environment America", centered in Denver, Colorado, is not generally indicated in these serials. The state issues cited here are all of those that were found for this bibliography; state advocate groups for states not cited here were not located. A couple of state advocate-group issues for Fall 2016 were located, but they did not include the Grand Canyon action alert, except for a short notice in a box on p. 1 of the issue, identical (except for host state name) to the boxed notice that appears in the issues cited here; nor were previous or subsequent issues pertinent. See also the note appended to ITEM NO. 13.4653, the *Environment Arizona* issue.

The comment was confined to issues at Grand Canyon National Park, specifically the aircraft overflight issue. The commenter suggested that NPS require backcountry permits be issued to individuals who participate in private scenic air tours over park lands. These excursions are short-term (1 hour or less) flights that originate outside the park. Although the flights often take place over park lands, the NPS does not have authority over airspace, which is under the authority of the Federal Aviation Administration. Small changes were made: the viewpoints were removed from park publications; signs were removed from the roadside, and speed limits were not reduced on approach. If possible, restrooms and even overlook barriers were removed. In short, the park started treating the overlooks as if they weren’t there. Use began to fall off. Today, some of these overlooks get fewer than a dozen visits a day.” (ENTIRE NOTE)]

(ENTIRE NOTE) Regarding the second trip (with Representatives Murphy, Taylor, French, and Hastings), see p. 1071: "The committee reached Las Vegas, Nev., on July 2 and traveled to Boulder City over the newly constructed railroad, arriving early on the morning of July 3. By bus the party traveled from Boulder City to the top of the Hoover Dam site. At this point the committee viewed the dam site and inspected the substation just installed by the Southern Sierras Power Co. for furnishing power for construction purposes. The company had completed this work, including the construction of a transmission line 235 miles long from Victorville, Calif., which will later be used for the transmission of power from the dam to outside communities. During the afternoon the committee motored to a point above the dam site and took motor boats down the river to the dam site and where the diversion tunnels are being excavated." (ENTIRE NOTE)]

Yankwich, Judge. Personal injury action by Elmer H. Mateas against Fred Harvey, a corporation. From a judgment dismissing the action, plaintiff appeals. Reversed and remanded for a new trial.* U.S. Circuit Court of Appeals, Ninth Circuit, 146 F.2d 989 (9th Cir. 1945). [The decision includes the following general information, which is explained at greater detail in the full document. "Plaintiff-appellant brought action against appellee for damages for personal injuries incurred when he fell from a mule belonging to appellee, herein called the Corporation. The complaint was originally filed in the Superior Court of California, but the case was removed to federal court because of diversity of citizenship. Trial was had without the aid of a jury under a stipulation to that effect. At the close of plaintiff's case the court granted defendant's motion to dismiss, and plaintiff appeals. [. . .] On the ride down the trail Chiggers tried several times to squeeze past the mule ahead on the outside or precipice side of the trail. After about two or three hours the caravan stopped for rest and luncheon at a camp called Indian Gardens. Upon resuming the journey appellant changed mules with an experienced rider, but after explaining to the guide that he could not handle Chiggers, he was required to remount and proceed on that animal. Almost immediately Chiggers took up his old trick of pressing forward. In a half hour or so, while Chiggers was pressing the mule ahead, appellant reined him back, and Chiggers started bucking, throwing and seriously injuring appellant."]
